

Notice To Customers

28 September 2011

Over recent months we have faced a number of issues including port congestion in Sydney and weather delays that have negatively impacted on our schedule.

We have kept ships moving by transferring calls from Sydney to Port Kembla and where possible sped ships up to recover lost time. However in order to realign the schedule to a fortnightly frequency the Capitaine Tasman V 103S will not berth in Melbourne until 14th of October.

While we regret the resulting delay for importers this step is necessary to restore the schedule for the peak season.

If you have any queries please do not hesitate to contact our office.
